

## 408 LIGHTHOUSE DRIVE

This home was identified on February 29, 2008 through the division's pro-active approach. There were multiple debris and landscape issues as well as structural painting issues with the house. Additionally, the roof needed to be replaced. Through the 'Paint Your Heart Out' program, the paint was provided by Solid Waste Authority and a team of volunteers was secured on September 20, 2008 to complete painting. Within hours, the exterior of the house had been completely renovated. To date, the home is still in need of roof repairs, which are currently underway. Approximate cost savings was \$2,000.
